			Cost (\$)	Start Date	Est. Jobs
Administration – Facilities and Maintenance	Building Re-roofing Program at Pastore Center and Zambarano (15 Buildings)	At Zambarano and Pastore campuses there is 356,000 square feet of roofs that are over 30 years old and in poor condition. 35% of this area is slate that needs to be replaced, and 65% would entail removal and replacement of insulation and membrane. Chronic leaks pose serious risk of injury / damage to people and property. Two of the roofs are out to bid and will start construction in May 2009; followed by the remaining buildings in succession.	\$12,600,000	45 days	
Administration – Facilities and Maintenance	Program to Repoint Brick Exteriors of 13 Buildings at Pastore Center	The aggregate area of wall surface to be repointed is 420,000 square feet. Bids will be solicited based on a generic specification which we have used on other buildings on campus. The buildings will be done in succession, two or three at a time.	\$7,560,000	90 days	
Administration – Facilities and Maintenance	Program to Upgrade Parking Facilities at Pastore Center	The Pastore Center has about 16 acres of parking lot in terrible condition that needs to be recycled in place and repaved. Also a total of 500 new parking spaces are needed. Proposals for reconstructing existing lots can be obtained via an RFP with little engineering. Designs for the new parking can be done while the reconstruction work is underway.	\$5,000,000	60 days

Administration – Information Technology	Establish a 'green technology' initiative within the Division to be proactive in improving energy efficiency in the use of technology to reduce cost and minimize environmental impact..	Establish a sustainable computing initiative designed to reduce the power consumption of technology by identifying and replacing the most inefficient devices in use by the state agencies today. Current projections are: 700+ desktop devices need to be refreshed/replaced with energy efficient models, installing power save software and educate users on benefits of green computing.	\$1,000,000	60-90 days from award	10
Administration – Information Technology	Implement an Enterprise level solution that will centralize/automate critical systems back ups and support our current disaster recovery initiatives.	Purchase an Enterprise level back up solution for the executive branch agencies to centralize/coordinate back up and disaster recovery capabilities. The appliance needs to be very modular and scalable to accommodate the State of RI's current disk pool requirements which can be expanded to hundreds of terabytes in the future.	\$1,200,000	60 days from award	5

			Cost (\$)	Start Date	Est. Jobs
Administration – Information Technology	Create a secondary internet feed to eliminate the State of RI's single internet point of presence	Install a 2nd internet feed in order to give the State of RI the physical diversity to our ISP's, increased carrier diversity (Cox, Verizon, dark fiber to OSHEAN), additional bandwidth to alleviate our current burdened pipe, and provide a redundant path for all our remote office connections. It would also provide a disaster site for all Capitol Hill's network connections which are currently vulnerable, including our VPN connections, DNS, web and email servers.	\$500,000	60-90 days from award	8
Administration – Information Technology	Establish an IT standard for Storage Area Network architecture that will consolidate storage requirements.	As the volume of documents and data storage in physical archives has grown rapidly, as well as, the need to access and retrieve these documents on a timely basis requires the imaging and storage of these records for efficiencies in the business process. This will give the State of RI the analysis and hardware (storage) requirements to implement an Enterprise Imaging Solution.	\$1,600,000	60-90 days from award	5
Administration – Information Technology	Establish a Enterprise copy/print center that will centralize copy/printing to support agencies	Purchase equipment and establish a Enterprise level copy/print center for the executive branch agencies to centralize/coordinate large quantity copy and print capabilities.	\$750,000	30-60 days from award	5
Administration – Information Technology	Replace current messenger & technical vehicles with more fuel efficient vehicles.	Purchase Hybrid vehicles to replace current older gas guzzler vehicles.	\$300,000	30-60 days from award
